Gondola Rack

BROTHERS RACK & FURNITURE

BROTHERS RACK & FURNITURE

Cantilever racks are often used in warehouses to store items like: Lumber, Metal tubing, Pipes, Drywall sheets, Furniture, Steel bars, Metal extrusions, and Carpet rolls.

Hanging Rack

Achieve extensive hanging storage for your garments with our easy-build, Heavy-Duty Longspan Garment Racking. Designed for industrial, commercial & retail use.

SLOTTED ANGLE RACKS

The Slotted Angle rack is very desired for lite duty and is cost-effective compared to the other racking system. Slotted angle racks are constructed using nuts and bolts. The loading capacity of a slotted angle rack can vary from 50 to 200 kilograms per shelf.

Shelving Racking System

Scaling up space in a small warehouse requires a bit of creativity and a lot of advanced planning. But, as your organization continues to grow and evolve, it can be difficult to estimate how much space and what type of structure you'll need. Planning and store planning must adapt to these inevitable changes.

Using Sector :

- Garment & Textile Industries
- Food and Beverage Companies
- Pharmaceutical Industry
- Tobacco industry
- Leather Industry
- Chemical Industry

Shelving Racking System

Shelves

Different types of shelves are available, to suit any requirement. The most commonly used are:

Gp Tray & Hollow Box Shelves
50% Perforation

Wire Mesh Shelves for Rack
85% Perforation

Gp Tray Shelves for Rack
5% Perforation

BRF company specialized in designing, manufacturing, calculating, and installing industrial racking and storage systems for heavy and light loads, complying with the most stringent European standards.

Mezzanine Racking System

BROTHERS RACK & FURNITURE

What Is Mezzanine Floor Racking Systems?

Mezzanine floor racking systems let your company optimize the vertical space of a warehouse by doubling or tripling the usable surface area. Adding mezzanine work platforms can be the most cost-efficient way to increase warehouse storage space without the expense of a building expansion.

Advantage:

- Customized for a variety of uses
- Increased Storage Capacity
- Cost-Effective
- Quick to install

BROTHERS RACK & FURNITURE

Pallet Racking System

What is Pallet Racking?

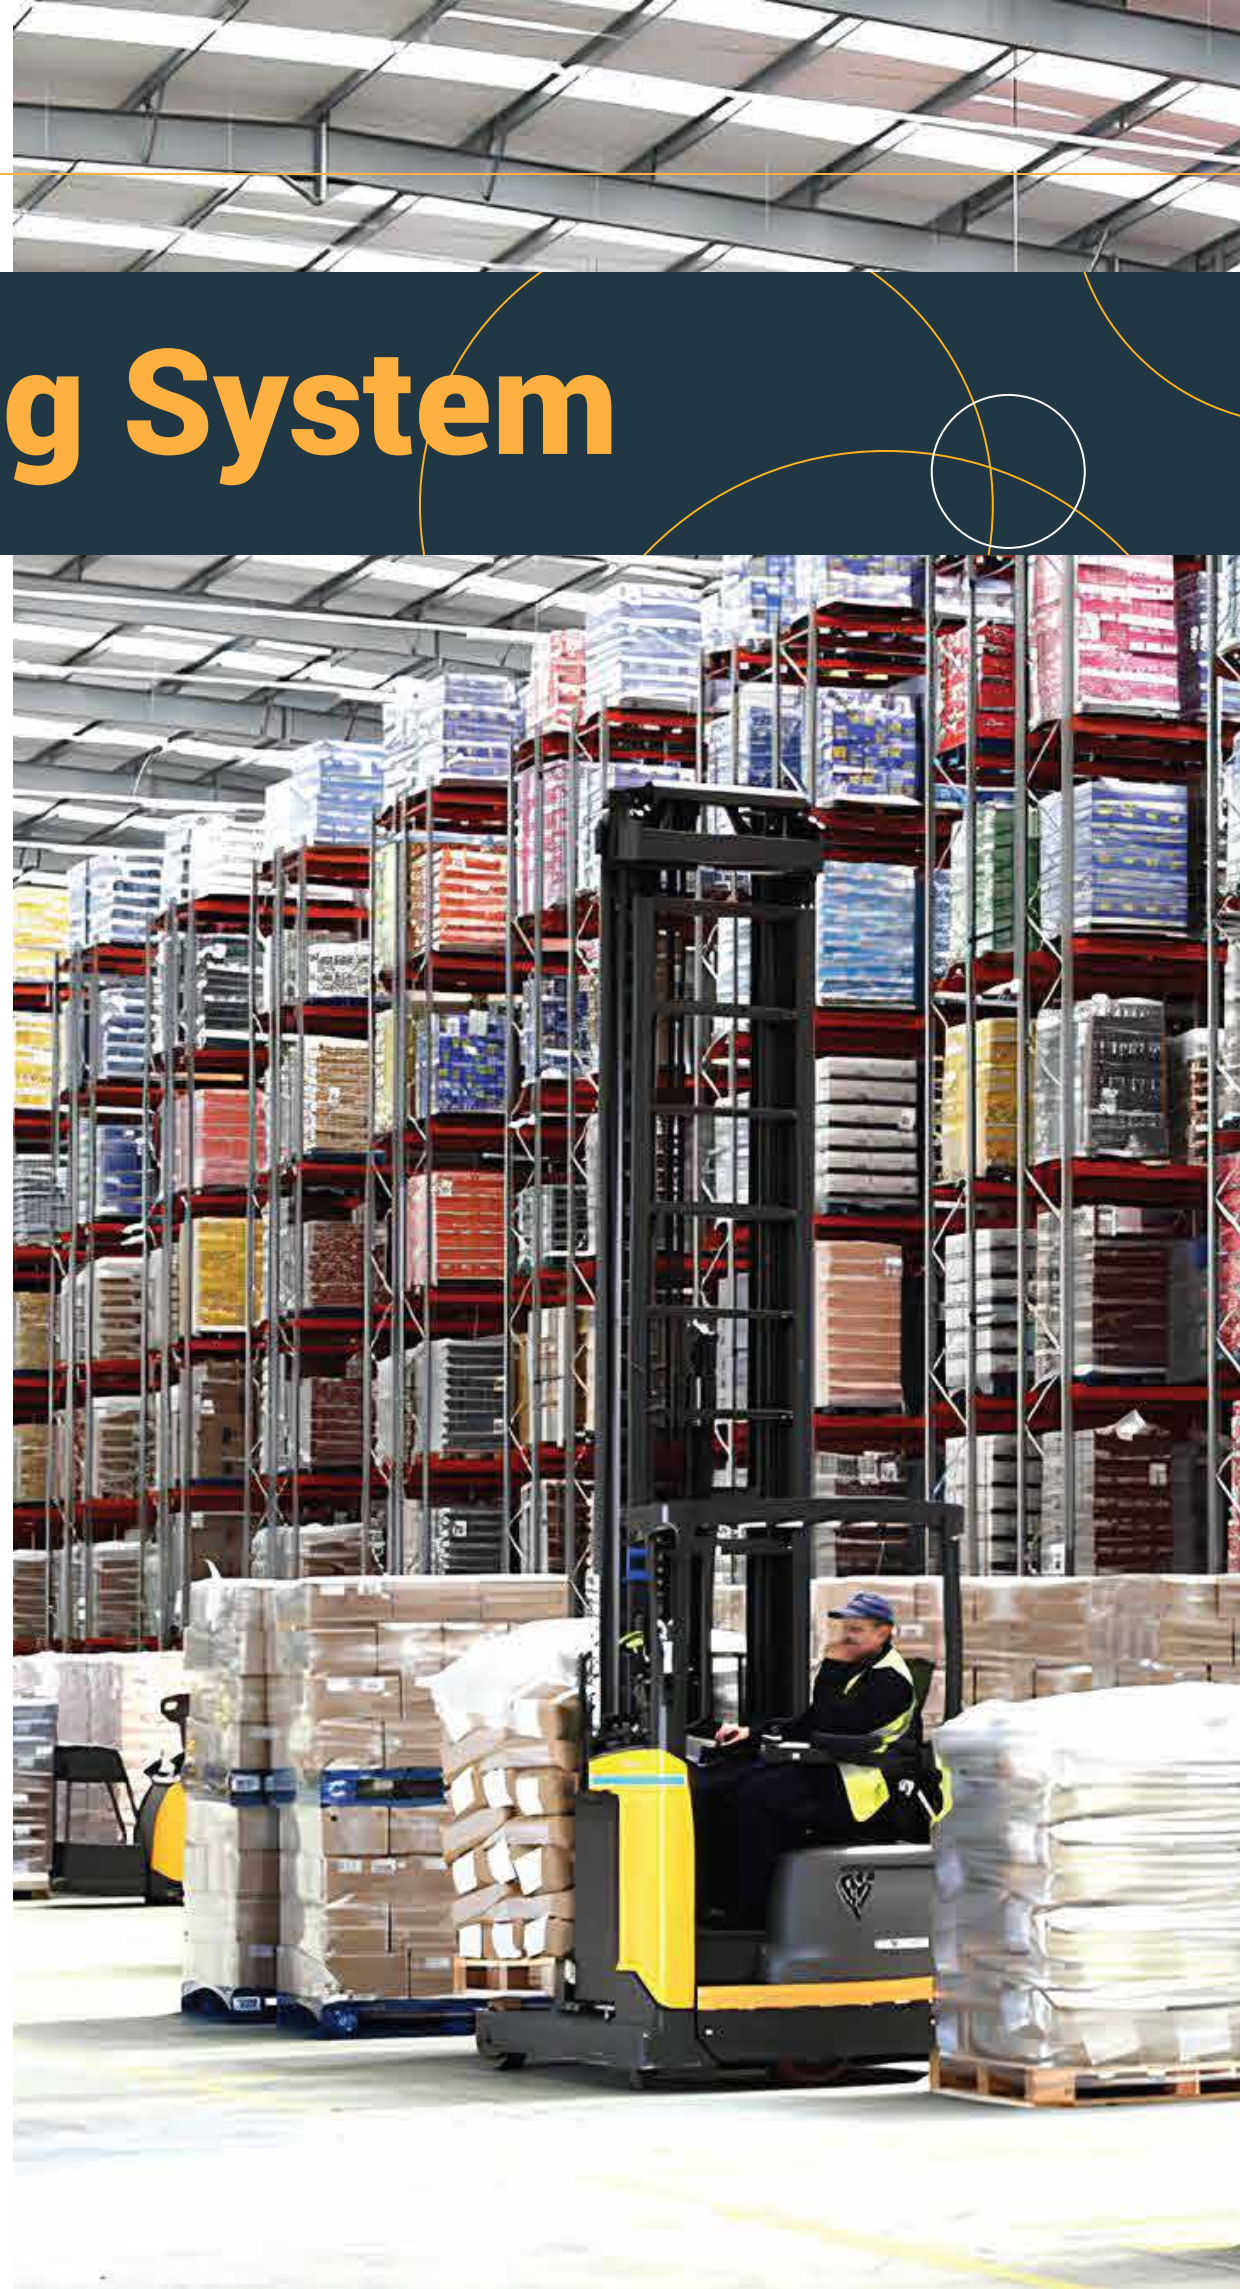

Pallet racking is simply a storage system that organizes pallets of material in rows on metal shelves. The system features multiple levels of shelving that are accessible by forklifts. These systems are used to increase storage density by using vertical space. Think of the benefit of building skyscrapers in a city with limited space, as the concept is the same.

VNA Racking

BROTHERS RACK & FURNITURE

VNA racking stands for very narrow aisle pallet racking and is usually used in warehouses to optimise the space available. These systems have an aisle width ranging from 1.5 – 2.0 metres depending upon the depth of pallet of the pallet being stored. This means that on average these systems free up to around 45% of the floor space.

Drive-In Racking

The ideal storage system to maximize capacity

Drive-in / Drive-thru racking are one of the best pallet racking systems for maximizing space. These systems are the highest density storage systems available. They have the potential to multiply the amount of usable storage square footage in your warehouse.

Drive-In racking to 75% more storage space than a standard pallet rack.

Fabrics Relaxation Rack

Storing fabric within a stockroom requires a specific style of shelving that provides enough depth to cope with long roolls of cloth also material. Fabric Rool storage racks has a close relation to carpet racking . This type of storge system s build from our standard heavy duty components.To achieve the require shelf depth two shelving bays are posiion one behind other .

Cantilever Rack

Cantilever racks are often used in warehouses to store items like:

Lumber, Metal tubing, Pipes, Dry-wall sheets, Furniture, Steel bars, Metal extrusions, and Carpet rolls.

Cantilever Racking is a storage system designed to store long, awkward, or bulky materials of virtually any length. Unlike any other pallet rack system, cantilever racks offer no vertical obstructions in the storage area.
